

Cancer Screening & Tests at Euracare

Breast Cancer Screening

The incidence of breast cancer is increasing in the developing world due to increase life expectancy, increase urbanization and adoption of western lifestyles. Euracare is providing Breast Cancer Screening services in recognition of the global effort in the early diagnosis and effective treatment of the cervix at a Pre-cancerous stage, to prevent cervical cancer from ever developing.

- Free breast exam
- Mammogram
- Breast Ultrasound
- Breast MRI
- Breast Cancer Antigen CA 15-3

Cervical Cancer Screening

Cervical cancer is a largely preventable disease, but worldwide it is one of the leading causes of cancer death in women. Cervical cancer is a health issue that disproportionately affects developing countries, where the Pap smear remains an important screening tool. Euracare is providing Cervical Screening services in recognition of the global effort in the early diagnosis and treatment of Cervical Cancer.

- PAP Smear:
 - Includes Cytology
 - HPV testing

Liver Cancer Screening

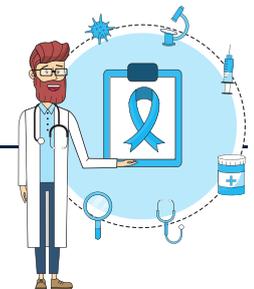

Liver Cancer is the sixth most common cancer in the world, but its very poor prognosis makes it the third leading cause of cancer-related mortality worldwide. The most prevalent cancers for men in Africa are prostate and liver cancer. Hepatitis B virus infection is the leading causal risk factor associated with Liver Cancer. Euracare is providing Liver Cancer Screening services in recognition of the global effort in the early diagnosis and treatment of Liver Cancer.

- Alpha-fetoprotein (AFP)
- Hepatitis B Profile
- Hepatitis C Antibody
- Abdominal Ultrasound

Colorectal Cancer Screening

Colorectal cancer (CRC) is one of the commonest cancers associated with diverse prognosis times in different parts of the world. Many African countries which were traditionally recognised as low-risk countries including Ghana, has reported an increase rate of CRC. Euracare is providing Colorectal Cancer Screening services in recognition of the global effort in the early diagnosis and treatment of Colorectal Cancer.

- Stool for Occult Blood
- GI Tumour Antigen CA 19-9
- Colonoscopy

Prostate Cancer Screening

Prostate cancer (PC) is the leading cause of cancer deaths among men in Ghana. Men living with prostate cancer in Africa face problems of early diagnosis and appropriate treatment. The mean ages at diagnosis for prostate cancer is 66.2 ± 7.1 years. Euracare is providing Prostate Cancer Screening services in recognition of the global effort in the early diagnosis and treatment of Prostate Cancer.

- PSA
- Urinalysis
- USG Pelvis
